WAVE / TLK Product Portfolio

TLK 25

Compact, powerful, and equipped with an intuitive voice assistant for seamless operations, the WAVE PTX TLK 25 Wi-Fi is designed for ease of use, efficiency and safety. Even with its slim profile, it still has all the safety features offered by traditional radio, including: fall alert, lone worker, and a dedicated emergency button.

TLK 100

Combines the broad coverage of a nationwide cellular network with the ease of two-way radio communications in a purpose-built device.

TLK 110

Combines the flexibility of push-to-talk communication via LTE in a more rugged device than the TLK 100. It also provides clearer communication with AI-backed noise suppression, as well as a dedicated emergency button to offer Fall Alert and Lone Worker through our safeguard subscription all in a non-LMR device.

TLK 150

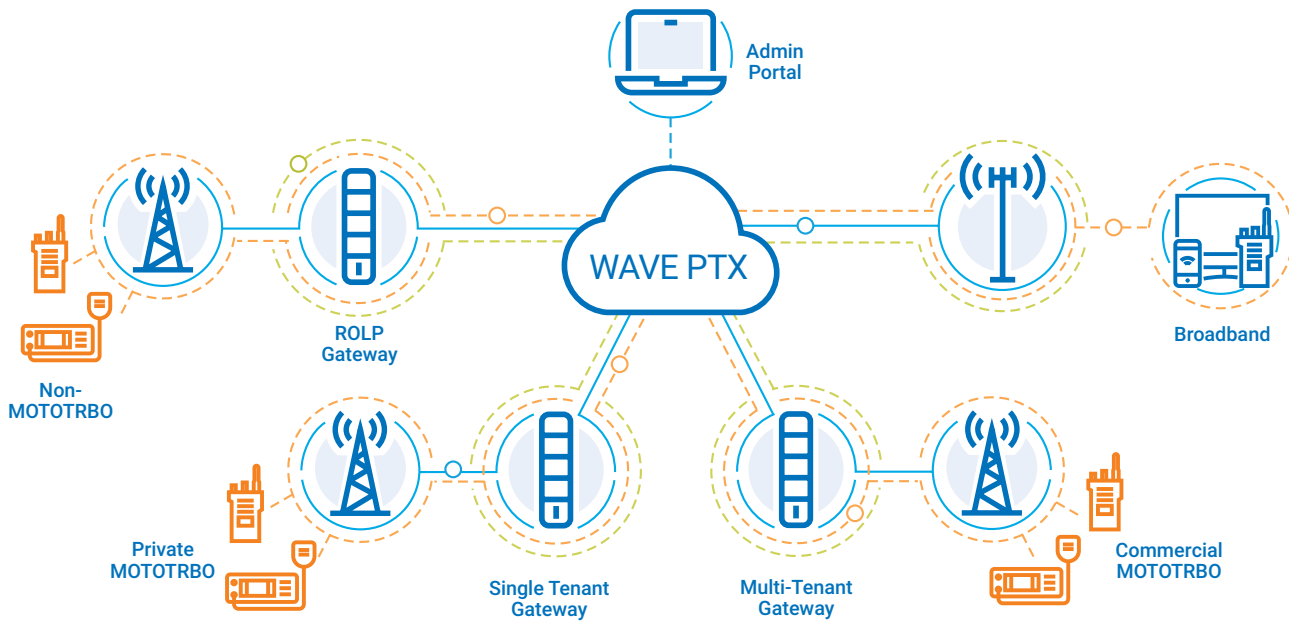

The TLK 150 is a broadband PTT mobile radio solution which can be quickly deployed in your vehicle fleet.

MOTOTRBO™ Ion

The rugged MOTOTRBO Ion smart radio is the first business-ready communication device with all-on voice and broadband data capabilities. The WAVE connectivity with the Ion radio can provide seamless voice communications across your Land Mobile Radio system and well outside your system coverage area.

MOTOROLA SOLUTIONS

Single Tenant/Multi Tenant Gateway

Wireless Gateways that can be added to an LMR system to provide interoperability between LMR and Broadband PTT solutions to expand your coverage nationwide.

- Single Tenant - Supports MOTOTRBO Capacity Max, Capacity Plus, Linked Capacity Plus, and Connect Plus
- Multi Tenant - Supports MOTOTRBO Capacity Max, Capacity Plus, Linked Capacity Plus, Connect Plus, and IP Site Connect
- RoIP Solution - Supports Non-MOTOTRBO and Analog and Digital Conventional System

“Bring your own device” PTT services

With a customer-provided user device, the WAVE PTX app provides carrier independent broadband PTT service and an extensive set of business critical PTT-based features to keep mission essential users informed and connected.

PC Dispatch

WAVE PTX dispatch capabilities ensure that from any Internet-enabled location, dispatchers can effectively manage day-to-day operations, with easy access to talkgroup scanning, multimedia communication, and location mapping and tracking. WAVE Dispatch also allows for call recording and call log tracking to improve situational awareness.

Evolve

The Evolve LTE handheld device offers instant PTT communications, full data capabilities and an open app ecosystem on the Android platform.

Uses and benefits for a wide range of industries

Manufacturing

- The TLK 110 has no range limitations, meaning that different workplaces can communicate with each other, no matter the location. And, it is interoperable with smartphones, tablets, MOTOTRBO and other TLK devices, so not only is it easy to incorporate into a company, but it can also assist in cross-device communication (ie. smartphones, tablets).
- The Evolve and ION Radio allow for both broadband PTT communication, as well as having the ability to view your facilities' video cameras and use business critical applications to make managing your business easier.

Education

- The TLK 150 keeps your buses in communication throughout the nation no matter if they are on your LMR system or out of range. Perfect for buses that need to travel for field trips or sports competitions outside the local area.
- The TLK 25 works with MOTOTRBO, smartphones and TLKs: connect different devices and staff:
 - MOTOTRBO and TLK radios for teachers and maintenance teams
 - TLK 25 in areas with reliable coverage: at front desks, offices, IT
- Dedicated emergency features for efficient, connected alerts and responses

Hospitality

- TLK 25 - Lightweight Device w/ Emergency button to keep housekeeping connected and safe
 - Guest or customer-facing roles can operate without taking attention away from the guest
 - No external speaker will reduce noise disturbances for employees and guests
 - Interoperable with smartphones, TLK radios and MOTOTRBO for mixed fleets
- TLK 150 - Keep shuttles connected on way back and forth to hotel and airport
- TLK 110 - Slim device for maintenance staff that is rugged enough to handle the job
- Ion - Leverage available Android apps to assist guests, all while communicating directly with staff through either their LMR or WAVE systems
- EVOLVE - Able to load apps like HotSOS and other workforce applications through the Android app store

Retail

- TLK 25 - Slim profile that can be worn on lanyard, clip, or in pocket. The device can also use wired earpiece accessories to manage calls and talkgroup switching through voice assistant.
- Compact and discreet for better customer interactions on the sales floor, at the register.
- Dedicated emergency features: strengthen loss prevention response and safety throughout entire stores.
- QR Code accessible training: easy comprehension for high turnover roles.
- Evolve - Scan barcodes and receive alerts from Orchestrate when triggers happen, all while communicating with staff.

Construction

- The TLK 110 features advanced AI-backed noise suppression technology to reduce transmitted background noise, delivering more audible and clearer communications.
- For even louder environments, the TLK 110 is compatible with a range of audio accessories to further improve hearing upon reception.

Healthcare

- TLK 25 is a lightweight purpose built device that is a great fit for users that were hesitant to use radio in the past due to its size.
 - Connects to existing Wi-Fi networks for easy deployment and reliable coverage.
 - IP67 rated: durable for chaotic environments and drops.
- IONs and Evolves allow users to communicate with the WAVE platform and still be able to view your associated video cameras from a single device. They can also integrate third party applications to be able to access patient data and other healthcare apps critical to their jobs.

Transportation & Logistics

- With the TLK 110 and in-vehicle TLK 150, managers can set up location-based talkgroups on devices, which use geofencing to automatically assign radios to a certain talkgroup. Radios can be set up to automatically switch from a "driving" talkgroup to a "manufacturing" talkgroup when a driver enters or leaves the facility, making workflows efficient and seamless.
- Companies can improve their efficiency by using PC Dispatch to not only track their users' locations, but also manage their communications.

Private Security

- Security employees can access clear, reliable communications and key emergency features with the TLK 110 and the WAVE PTX SafeGuard package. Mitigate high-stress situations with emergency features like Lone Worker, Fall Alert and the TLK 110's dedicated emergency button. And, with AI-backed noise suppression and broadband PTT, the TLK 110 provides instant, intelligible communication for security teams to successfully work and manage high-stress situations.
- Security companies can be quick to respond to an incident by tracking their Push to Talk users with WAVE's PC Dispatch solution.
- Using a 3rd party bluetooth paired with the WAVE Application, allows for discreet communications.
